

INSciTS

Building the knowledge base  
for effective team science

## **INSciTS Summer of Team Science Pre-Conference Event**

This summer, as a prelude to the SciTS 2022 conference, INSciTS is hosting periodic virtual seminars on developments in the science of team science. Our goal is to provide the INSciTS community with opportunities to engage in initiatives that build momentum for our more in-depth discussion during the 2022 conference July 31-August 3. Below you'll find information on our upcoming session, along with information on how to register. Please contact [Maritza.Salazar@uci.edu](mailto:Maritza.Salazar@uci.edu) if you have questions about any past events.

### INSciTS Summer Session 3

## ***The Team Science Toolkit: Past, Present, and Future***

**Wednesday, July 20, 2022**

**9:00am (PDT), 12:00noon (EDT), 6:00pm (CET)**

***Register for event here:***

What do we need from a future Team Science Toolkit? In this interactive session, we will review the history of NCI's Team Science Toolkit and toolkits in general, and then crowdsource ideas on possible form, content, and function from the audience. An exploratory committee has been asked to provide recommendations for a future version of the Team Science Toolkit to the INSciTS board in Fall 2022. Through breakout groups and other formats, participants will seed the Committee's work and prepare for the next round of input during the SciTS 2022 conference.

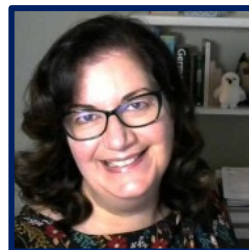

**Kara Hall**, National Cancer Institute, NIH  
*Co-creator of the original Team Science Toolkit*

**Bethany Laursen**, Michigan State University and Laursen Evaluation & Design, LLC  
*Chair of the Toolkit Exploratory Committee*

**Julie Thompson Klein**, Wayne State University & Transdisciplinarity Lab of USYS at ETH Zurich  
*Toolkit Exploratory Committee Member*

**Karen Liston**, Wayne State University Libraries  
*Toolkit Exploratory Committee Member*
